## REGULAR MEETING

### OF CITY COUNCIL LAST EVENING

Council Addressed on Various Matters—The Public Works Commissioner Accepts Appointment.

The city council met in the usual place last evening in regular session. Mayor McKenzie and Aldermen May, McLeod, Clarke, Fraser, Boyle, Bellamy and Picard were present. As several parties were in attendance to address the council the usual order of business was suspended and the matters concerned taken up immediately.

#### Hospital Drainage.

A petition was presented from residents of the west end complaining that slops from the General Hospital were being dumped on the street and asking that this be stopped. The medical health officer said that during the past summer, with the permission of the council, a purification chamber and channel had been constructed to provide drainage for the hospital until the sewer extensions were made. When he had last seen this, previous to its being closed in for the winter, it was working all right. He had heard that

garbage and manure had been dumped on the lot in which the hospital is situated, and if so would have this removed at once. The health officer and the city engineer were asked to inspect the premises to-day and report at the meeting to-morrow evening.

#### The Proposed Park Purchase.

Mr. J. A. McDougall was the spokesman of a delegation from the Edmonton Industrial Exhibition Association to urge the early settlement of the offer made the city for the purchase of the property. Mr. McDougall said the purpose for which the exhibition had been started and continued was for the benefit of the town and district, but as there was no money to be made out of the venture, and as the public had not been as ready with contributions toward the enterprise as desirable, the association had decided to continue the fair no longer unless the grounds were purchased by the city. As to the arrangement which the association wished to make with the city for the use of the grounds for exhibition purposes this would be left until after the sale, if such was made, when the city would have the matter entirely in hand. He assured the council that the property could be sold for more

## THE CITY COUNCIL AND PUBLICITY.

An explanation or decision given by Mayor MacKenzie at Monday evening's meeting of the city council defined the attitude of the present council towards the press, or in other words toward the publicity of public affairs. Last week for the first time in history a representative of the reading public was admitted to a committee of the whole meeting of the city council, but with no definite understanding as to whether the publication of the transactions of the committee would be considered a breach of faith. Alderman Boyle referred to this aspect, of the case on Monday evening, when he voted against the motion to go into committee of the whole if this meant retirement from the council chamber to which the public were admitted. His Worship laid down the rule that such publication or non-publication rested with the papers and not with the council. The statement, finding no dissenting voice at the board, evidenced the willingness of the council that the business of the public should be conducted in as public manner as possible or wise.

Rightly or otherwise it has been admitted heretofore that the council had the right by resolving into committee of the whole to retire from the public and thresh out details in private, the report of the committee being afterwards accepted by the council sitting as such. The members of the present council have not raised the question of the validity of this custom but courteously extended the disputed privilege. Circumstances may occasionally arise when the interests of justice, fairness, or public welfare, may be better served by a temporary or partial reservation of details but the exception is rare enough to confirm the contrary rule.

The action of the council is the establishment of a precedent which future bodies will hardly care to violate. The public has a deeply rooted belief that the people should know how the business of the people is being conducted and may be relied upon to look other than favorably upon any proposal tending to make a committee chamber the tomb whence no detail returns.

## CONCERT AT AGRICOLA.

Contributed.

We are pleased to be able to report that the concert held at Agricola on Friday last in aid of the St. George's Parsonage Fund was a marked success and the promoters have every reason to congratulate themselves on the result of their endeavors.

There were close on 100 present, the Fort being well represented. The Rev. Canon d'Eaum, M.A., took the chair at a few minutes after eight, and the programme lasted until 11:15, every item being received enthusiastically. Light refreshments were handed round during the interval and at the close a short dance brought a most enjoyable evening to an end and all present were unanimous in declaring it a great success.

## PROGRAMME.

## PART I

1. Instrumental Trio (Mrs. Baetz, Canon d'Eaum, M. Sutherland)
2. Song (Miss J. Sward)
3. Song (Mr. S. Sior)
4. Song (Mr. Powell)
5. Song (Mr. Baetz)
6. Selection on G. amaphone.
7. Song (Canon d'Eaum)
8. Song (Miss J. Pollard)

Interval for refreshments, during which several selections were given on a gramophone, accompanied Miss Baetz.

## PART II

9. Instrumental Trio (Mrs. Baetz, Canon d'Eaum, Mr. Sutherland)

Synopsis of Regulations for Disposal of Minerals on Dominion Lands in Manitoba, the Northwest Territories and the Yukon Territory

Coal.—Coal lands may be purchased at \$10 per acre for soft coal, and \$20 for anthracite. Not more than 320 acres can be acquired by one individual or company. Royalty at the rate of 10 cents per ton of 2000 pounds shall be collected on the gross output.

Quartz.—Persons of eighteen years and over and joint stock companies holding free miners' certificates, may obtain entry for mining location.

A free miner's certificate is granted for one or more years, not exceeding five, upon payment in advance of \$7.50 per annum for an individual and from \$50 to \$100 per annum for a company, according to capital.

A free miner, having discovered minerals in place, may locate a claim 1,500 by 1,500 feet by marking out the same with two legal posts bearing location notices, one at each end of the line of the lode or vein.

The claim may be recorded within fifteen days if located within ten miles of a mining recorder's office, one additional day allowed for every additional ten miles or fraction. The fee for recording a claim is \$5.00.

At least \$100 must be expended on the claim each year or paid to the mining recorder in lieu thereof. When \$500 has been expended or paid the locator may, upon having a survey made, and upon complying with other requirements, purchase the land at \$1.00 per acre.

Permission may be granted by the Minister of the Interior to locate claims containing iron and mica, also copper, in the Yukon Territory, of an area not exceeding 160 acres. The patent for a mining location shall provide for the payment of

royalty on the sales not exceeding five per cent.

Placer Mining, Manitoba and the N. W. T., excepting the Yukon Territory.—Placer mining claims are generally 100 feet square, entry fee \$5.00, renewable yearly. On the North Saskatchewan river claims for either bar or bench, the former being 100 feet long, and extending between high and low water mark. The latter includes bar diggings, but extends back to the base of the hill or bank, but not exceeding 4,000 feet. Where steam power is used, claims 200 feet wide may be obtained.

Dredging in the rivers of Manitoba and the N. W. T., excepting the Yukon Territory.—A free miner may obtain only two leases of five miles each, for a term of twenty years, renewable in the discretion of the Minister of the Interior.

The leasee's right is confined to the submerged bed or bars of the river below low water mark, and subject to the rights of all persons who have or who may receive entries for bar diggings on bench claims, except in the Saskatchewan river, where the leasee may dredge to high water mark on each alternate leasehold. The leasee shall have a dredge in operation within one season from the date of the lease for each five miles, but where a person or company has obtained more than one lease, one dredge for each fifteen miles, or fraction, will be sufficient. Rental, \$10 per annum for each mile of the river leased. Royalty at the rate of two and a half per cent, collected on the output after it exceeds \$10,000.

Dredging in the Yukon Territory.—Six leases of five miles each may be granted to a free miner for a term of twenty years, also renewable.

The leasee's right is confined to the submerged bed or bars in the river below low water mark, that boundary to be fixed by its position on the first day of August in the year of the date of the lease.

The leasee shall have one dredge in operation within two years from the date of the lease, and one dredge for each five miles within six years from such date. Rental, \$100 per mile for first year, and \$10 per mile for each subsequent year. Royalty same as placer mining. Placer Mining in the Yukon Territory.—Creek, gulch, river, and hill claims shall not exceed 250 feet in length measured on the base line or general direction of the creek or gulch the width being from 1,000 to 2,000 feet. All other placer claims shall be 200 feet square.

Claims are marked by two legal posts, one at each end, bearing location notices, and must be obtained within ten days. If the claim is within ten miles of a mining recorder's office. One extra day allowed for each additional ten miles or fraction.

The person or company staking a claim must hold a free miner's certificate.

The discoverer of a new mine is entitled to a claim of 1,000 feet in length, and if the party consists of two, 1,500 feet altogether, on the output of which no royalty shall be charged, the rest of the party's ordinary claims only.

Entry fee, \$10. Royalty at the rate of two and one-half per cent, on the value of the gold shipped from the Yukon Territory to be paid to the Controller.

No free miner shall receive a grant of more than one mining claim on each separate river, creek or gulch, but the same miner may hold any number of claims by purchase, and free miners may work their claims in partnership by filing notice and paying fee of \$2. A claim may be abandoned, and another obtained on the same creek, gulch or river by giving notice and paying a fee. Work must be done on a claim each year to the value of at least \$200.

A certificate that work has been done must be obtained each year; if not, the claim shall be deemed abandoned, and open to occupation and entry by a free miner.

The boundaries of a claim may be defined absolutely by having a survey made, and publishing notice in the Yukon Official Gazette.

Hydraulic Mining, Yukon Territory.—Locations suitable for hydraulic mining, having a frontage of from one to five miles, and a depth of one mile or more, may be leased for twenty years, provided the ground has been prospected by the applicant or his agent, is found to be unsuitable for placer mining, and does not include within its boundaries dredging claims already granted. A rental of \$150 for each mile of frontage and royalty at the rate of two and one-half per cent of the value of the gold shipped from the Territory are charged. Operations must be commenced within one year from the date of the lease, and at less than \$5,000 must be expended annually. The lease includes all base metals, quartz and coal, and provides for the withdrawal of unappropriated land for agricultural and building purposes.

Petroleum.—All unappropriated Dominion lands in Manitoba, the Northwest Territories and within the Yukon Territory, are open to prospecting for petroleum, and the Minister may reserve for an individual or company having machinery on the land to be prospected, an area of 400 acres. Should the prospectors discover oil in paying quantities, and satisfactorily establish such discovery as an area not exceeding 640 acres, including the oil well and such other land as may be determined, will be sold to the discoverer at the rate of \$1.00 per acre, subject to royalty at such rate as may be specified by order-in-council.

### Regular Meeting of City Council.

Continued from page one

than was being asked for it from the city, and reminded them that while the onus of accepting or rejecting the by-law when presented would be upon the rate-payers the odium of rejecting the petition would rest with the council. The Mayor assured the delegation that the matter would be dealt with in the ordinary course of business.

### Immigration Matters.

Secretary Tims of the board of Trade introduced Theodore M. Knappen of the Western Canada Immigration Association who asked the privilege of addressing the council briefly. He detailed the history, purposes, and manner of work of the association, and suggested that Edmonton, in common with other cities in the West, should contribute toward the funds of the association. He also informed the council that the association conducted an advertising agency in connection, and without charge would handle any special appropriations for advertising the city which the council might wish spent in the United States.

### Sugar Beet Proposition.

Mr. E. Telford addressed the council in connection with a communication from himself re the establishment of a sugar beet factory at Edmonton. He explained that he had met the promoters of a company in Montana and they had expressed a willingness to put up a factory here if the city wanted it and were disposed to make a satisfactory inducement. Mr. Telford did not know how much this might be and after a lengthy discussion a motion was passed that the council would be prepared to consider a definite proposal for the establishment of a factory here.

### Debtors By Law.

O. M. Biggar wrote re the debtors for certain of the city debentures negotiations for the purchase of which were under way with R. W. Smith of Montreal. The legal technicalities of the case were expounded by Messrs Biggar and Beck and a bylaw prospective purchasers were read three times and finally passed.

### Communications.

Several letters were read from people having private skating rinks, objecting to the water rates charged them. The committee in charge of the water service was asked to look into charges and report.

O. B. Fysh of Moose Jaw and Smith and Markley of Montreal wrote enclosing notices of applications for charters to build railways throughout this region. The letters were filled.

A bunch of communications referring to minor matters shared the same fate.

On request of the tenants it was decided to wire the house purchased from Mr. F. Fry by the city, that electric lights might be installed.

Mr. Hargreaves of Winnipeg the new Public works commissioner wired accepting the offer and saying he would probably be able to reach Edmonton during February. Mayor McKeuzie undertook to write Mr. Hargreaves urging on him the necessity of taking up the work as soon as possible.

A long communication from the city auditor was laid on the table till next meeting. The council adjourned until Thursday evening of this week.

## When millions of experienced housekeepers have been using Sunlight Soap

for years, for their every requirement, why should not you use it? Try it next wash day, and if you do not find it better than any other soap you have ever used, your grocer will refund your money. Sunlight Soap washes equally well with hard or soft water. No scrubbing, no boiling.

Sixth—Four bottles Scotch and four tins Imperial mixture.

Seventh—Four pairs suspenders and ties.

Eighth—100 cigars and 2 socks flour.

SEVENTH EVENT—Grand Aggregate.

Four pairs solid gold cuff links presented by A. Bruce Powley.

## POPLAR LAKE NEWS.

Continued.

Mr John Kennedy of Poplar Lake is storing his oats in Edmonton waiting for a higher price.

The people of this vicinity are doing much more fighting this winter than in past seasons.

A general meeting of the Canadian Branch of the American Society of Equity was held in Poplar Lake school on Saturday 28th ult. This society is in effect a farmers union which has for its motto "Controlled marketing of farm produce." The cause which is at the organization is the constantly widening space between the price paid the producer and the selling price to the consumer. Capitalists, speculators, millers and middlemen, the farmers believe create this unnatural widening space between the producer and the consumer. The aim of this organization is to have the price of farm produce set in a natural way, by the supply and demand of the world—not in an arbitrary way by manipulators. Local farmers have already been formed in Poplar Lake, Belmont and Turnip Lake school districts, nearly every farmer in each district joining. The scheme has met with the approval of many farmers in other districts to whom it has been explained. Plans were adopted to send literature to the secretaries of school districts in Northern Alberta, and subsequently to have each district formed into a local union if they so desired.

The SEMI-WEEKLY BULLETIN covers the business field tributary to Edmonton as no other publication does. Don't spend your money on fake advertising. The BULLETIN will take your story into more homes for less money than any other means or agency.

WHAT COSTS  
MOST

WHOLE lot of people fancy the cigar business is a snap! They figure out that all you need is some cases of tobacco, a few cigar makers, and the name of some stage

favorite or prominent man.

The quality of the filler does not interest them at all—the binder is beneath their notice—but the wrapper and the name is all important.

They can sell this kind of cigar at \$55.00 a thousand, give a gold watch into the bargain, and then make a good size profit.

The principal cost of Pharaohs is in tobacco—I buy the best filler in the world—a Cuban leaf—one I select myself from the best of the Manicagua district, in the Province of Santa Clara—a Connecticut broad leaf as binder, the most expensive in the world—and I import a clear leaf Sumatra from Holland as wrapper.

I secure by this means a superb cigar, a fragrant, even smoker—very palatable—very superior to the ordinary run of cigars.

John Bruce Powley  
GRANBY, P.Q.

None genuine unless branded PHA-RO

**Cramps**  
Seems odd that a remedy that cures rheumatism, neuralgia, sprains and bruises—will cure cramps. But it will. Hirst's Pain Exterminator cures pain wherever located. A teaspoonful internally—and a little rubbed on the stomach—quickly takes away the cramps.

**Hirst's Pain Exterminator**  
Is equally effective in checking Diarrhoea and all other Bowel Troubles. There's always a need for it in every home. A bottle on the medicine shelf saves many a doctor's bill.

Miss Rosette Good of Greenock says: "My mother has used Hirst's Pain Exterminator and says it is the best medicine in the world for Cramps in the stomach and Bowel Complaint."

MISS ELIZABETH HAMPSON OF MORRISVILLE, VICTORIA:  
"We cannot do without Hirst's Pain Exterminator in the house. It is a wonderful medicine for Cramps, Rheumatism and Neuralgia."

## THIS IS TRULY THE IRON AGE.

Some Pertinent Facts in Regard to Iron and Iron Mining.—The Returns to Shareholders from Iron Properties Greater than from any Other Class of Investment, The Iron Mines of The Edmonton Coal and Iron Mining Company Promise Much to the Owners and to the Prosperity of Edmonton and Northern Alberta.

We often hear the expression "the iron age," but few of us realize what this term actually means when applied to the present era, as it often is.

In order to better grasp its meaning, and still further to appreciate to the fullest extent all that it entails, let us look back to the "Iron Age" of past history. In those early times when man was yet in his infancy, so far as civilization and enlightenment goes, when life meant a continued struggle for the supremacy of the race, in short, when his best efforts were limited to an extent which it would be impossible for us in our day to imagine, his sole ambition stopped short at the manufacture of a few crude household utensils and weapons of war and the chase. How different it is with us today! Not only are we equipped with cooking utensils and arms of the finest description but, what is still more to the point, we have subjected this all important metal—the greatest of all nature's gifts to her children—to our almost every need. Not only do we use iron and steel which we may call its offspring, for our houses, but we use it for the actual construction of our largest buildings and it is daily becoming more popular. Again, our bridges, railroads, waterways, subways, docks, shipyards, vessels, in fact all our great modern engineering feats and efforts would fail utterly were it not for the presence and the skillful adoption and use of this wonderful metal, iron.

It would not be too much to state that were we to eliminate the use of iron in its various forms from our present day commodities not only would the commercial world be suddenly checked but we should gradually and surely drift backward to the starting point; the various branches of trade would have ceased, commercial enterprise would be a thing of the past and civilization would be a mere matter of history. Therefore viewing things from this, the only proper light, the logical conclusion we must arrive at is that this twentieth century is the iron age, the iron age of the past being merely the embryonic forecast of the world's great future. Such being the case let us turn to the material side of the question "since iron is practically the fundamental basis of our modern civilization and since it is used to such a vast and ever-increasing extent, how is the supply to keep pace with the demand?" Clearly the field is a large one and even the great iron mines now working are not so numerous as to be able to swamp the market at their present output. There is more demand today than there ever was for a good iron mine, and this is especially applicable to certain countries and sections of countries.

Speaking of our own country—this vast Canada—with its limitless resources in the form of minerals, timber etc., here we have a young country, a growing country, full of great prospects and with a vast future. Unhindered by the fogs and mists of uncertainty or incompetence she looms in before us in all her might. With outstretched arms she invites us to share her gifts and her future. Her dowry is an ample one, nor does she withhold it from those who have the wisdom to know her charms; her veins are of fine gold. Her ornaments are many and precious. Her will is of iron and as surely her will controls her actions so surely must her iron control her future. With this iron she will build her railways, the Grand Trunk and the Canadian Northern, albeit in themselves a vast undertaking being but an earnest of future and of still greater enterprise. She must have also thousands and one other necessities which go to build up a large nation, which she will surely one day become. Think of this, to build a nation! Great as is upon our minds when this implies and answers itself the question "How are we going to obtain all this iron which is needed?" The answer is simple. Either Canada must import it all her iron and by this we include steel, or she must supply her own iron. Would we, knowing that we have fruit in our garden, go elsewhere to obtain it at a greater cost? It hardly seems feasible. Then let us think what we have ready to our hand. In other words let us take hold of the vast iron deposits which we know from the best authorities and can see for ourselves we possess. Let us work them, let us make them into a thing of value, let us get away from the "cheap" and with due regard to economy and the probable measure of success which such location promises.

There are those who would say that the average percentage of iron mines which are paying is small compared to the number of mines upon which large sums of money have been spent. Here again, notwithstanding the fact that although the number of failures in iron mines has been far less than that of any other mineral, we find a class of people who rely rather upon their own ideas of what should be, than upon the advice of experts who deal with the things that are. Such is the class who would, after losing money by their own careless speculations, decry any form of mining, who in short impede the march of progress.

It has been said that in order to take an intelligent interest in the affairs of his country every man should study politics. How much more then should he not take an active interest in building up his country by studying its natural resources and assisting to develop them?

It almost devolves upon us as a duty, which we owe to our children, and our children's children, this laying of the foundation stones of the future, and this being the age of iron it would seem that in that direction lies the work we have set ourselves to perform.

One naturally asks "where am I to start and how?" We will consider the first part of the query carefully, being guided by past experience and backed up by statistics, for these are the testaments exacted from us by nature before she will yield up her stores in trust for future generations. Taking the iron belts on this continent of America we find that they have their defined limits and their directions as truly as the arteries in the human body. For instance if we find the brachial artery near our armpit and run across it again at our wrist we may safely conclude that it is the same artery, or lead as it would be termed in mining parlance. It is not our design to bewilder the reader or prospective investor with a list of iron mines paying high dividends, nor do we sketch out geographical charts of all the iron districts and leads on the American continent, but the following example will serve to show the well nigh infallibility of mining operations when carried out on the basis above illustrated. We refer to the world famed iron mines of the Mesabi range in Minnesota, U. S. A. Throughout the entire length of this range in recent years there have been many valuable claims taken up and today some of them net an enormous income to those who were far-sighted enough to invest in them. One particular case is that of a gentleman who now rejoices in the sobriquet of "Iron King" of Duluth. About twelve years ago he purchased eighty acres of timber land in the iron belt above named for the sum of \$300,000. After inspecting the timber he offered to sell his property for less than he had paid for it, but no one would buy it. Some two years after he discovered that the iron oxides exposed on his land were valuable, and he sold the right to take the iron off his land to the American Steel Corporation, charging them 25 cents per ton for all the ore they took. This has netted him \$8,000,000.00. His income from this source alone is \$750,000 per day.

Almost due north some 1000 miles from this Mesabi range lies an immense deposit of iron oxide, the property of the Edmonton Coal and Iron Company of Edmonton. It is located near Edmonton in Northern Alberta, not far from the Canadian Northern Railroad and close to the route of the Grand Trunk Pacific, besides which it is within eight miles of the Saskatchewan river which is navigable, and is connected by wagon roads to Edmonton.

Amongst other experts, Mr. Wm. Blakemore, member of Institute of Mining Engineers, England, has reported on this valuable property. He says that in his opinion the company has in this case a "most valuable asset and easily and quickly realizable, as it is more than likely from the character and occurrence of the deposits that the springs come from a stratified ore body below which could be exploited by boring."

Adding to a proposed expenditure of \$10,000,000 he adds "Having had thirty years experience in locating and working various iron deposits, I have no hesitation in saying that this is available property and one which will justify the expenditure recommended."

The mine deposits he finds by the ton consists of 45.2 per cent. of metallic iron from surface ore and as he further states, not only could it be used to produce an excellent paint, for which it is a market, but it could also be used in combination with other ores or smelting and iron and steel manufacture, similar to that so successfully smelted at the Badger ranges. Quebec province for many years has been a valuable and immense property has created such a stir among mining circles in various parts, not only of this country but elsewhere.

Is without doubt the best in Alberta, and we will be glad to show you that our prices are right and that we can save you money on all your purchases.

Yours for business,

REVILLON BROTHERS, LIMITED.

## We Offer \$1,000

For a Disease Germ That Liquezone Can't Kill.

On every bottle of Liquezone we offer \$1,000 for a disease germ that it cannot kill. We do this to assure you that Liquezone does kill germs.

And it is the only way known to kill germs in the body without killing the tissues, too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact which gives Liquezone its worth to humanity; a worth so great that, after testing the product for two years, through physicians and hospitals, we paid \$100,000 for the American rights. And we have spent over one million dollars, in one year, to buy the first bottle and give it free to each sick one who would try it.

### Acts Like Oxygen.

Liquezone is not made by compounding drugs, nor is there any alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research.

The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is an absolutely certain germicide. The reason is that germs are vegetables;

and Liquezone—like an excess of oxygen—is deadly to vegetable matter.

Liquezone goes into the stomach, into the bowels and into the blood, to go wherever the blood goes. No germ can escape it and none can resist it. The results are inevitable, for a germ disease must end when the germs are killed. Then Liquezone, acting as a wonderful tonic, quickly restores a condition of perfect health. Diseases which have resisted medicine for years yield at once to Liquezone, and it cures diseases which medicine never cures. Half the people you meet—wherever you are—can tell you of cures that were made by it.

### Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquezone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

### 50c. Bottle Free.

If you need Liquezone, and have never tried it, please send us this coupon. We will then mail you an order on a local druggist for a full-size bottle, and we will pay the druggist ourselves for it. This is our free gift, made to convince you; to show you what Liquezone is, and what it can do. In justice to yourself, please, accept it to-day, for it places you under no obligation whatever.

Liquezone costs 50c. and \$1.

### CUT OUT THIS COUPON

For this offer may not appear again. Fill out the blanks and mail it to The Liquezone Company, 525-54 Wabash Ave., Chicago.

My disease is \_\_\_\_\_  
I have never tried Liquezone, but if you will supply me a 50c. bottle free I will take it.

Give full address—write plainly.

Any physician or hospital not using Liquezone will be gladly supplied for a test.

**TRAIN SERVICE**:—Leaves for Strathcona 7.45 and 15.30. Arrives from Strathcona 9.15 and 16.50.

#### LOCAL

—Train on time.

—Workmen are repairing a break in the watermain on 5th street east.

—Cushing Bros. have closed down their mill for a few days while taking stock.

—The first carnival of the season will be given on the Strathcona rink this evening.

—Supreme court opened in Ft. Saskatchewan yesterday before Judge Harvey.

—The Ogilvie Milling Co. are distributing as an annual reminder a very attractive reproduction of an oil painting.

—The fire brigade was called out last evening. The fire was located in the residence of Mr. H. Sigler and was extinguished with little damage.

—The first game between the junior hockey teams of Edmonton and Strathcona for the Hockey cup which was to have been played this evening has been postponed.

—Messrs Ginter, Starkweather and Johnston who have been operating the boring plant of the Alberta Oil and Gas Co. here left this morning for Philadelphia. Operations have been temporarily suspended at a depth of 1100 feet.

—Vancouver Province:—After a shutdown lasting from a month to five weeks, the time varying in the cases of different establishments, all the lumber mills in Vancouver are again in operation. Several of the mills worked in a desultory sort of manner last week, but this morning the work of manufacturing began in earnest.

—Ottawa, Jan. 28.—In the House of Commons today, Sir Wilfrid Laurier stated that he thought the bill regarding provincial autonomy for the Northwest Territories, would be ready about the middle of February. During the discussion on supply of Indian affairs, Mr. Cockshutt of Brantford, advocated restoring to the Indians the franchise of which they had been deprived.

—Theodore M. Knappen of the Western Canada Immigration Association came in last night and addressed the board of trade this morning on immigration matters. The purpose of his visit here is to secure a donation to the purposes of the association which was organized some time since to supplement the work of the Dominion Government in inducing American people to immigrate to this country. Mr. Knappen expects a large influx of settlers from the Republic to Canada during the year. The council will be asked to make a grant to assist the work.

—Free Press:—J. Gann & sons, the well known bridge contractors, have been awarded the contract for the new Canadian Northern Railway company's bridge over the south branch of the Saskatchewan river within fifteen miles of Prince Albert. The structure consists of nine spans of 150 feet each, the track being 100 ft above low water. The piers are to be built of concrete and trusses of steel. The structure is to be completed by Sept. 1, but the contractors will erect false work to carry over trains to Prince Albert as soon as the ice goes out and will have the foundations for the piers in before the ice moves.

—A dispatch from Vancouver says:—The British Columbia shingle manufacturers have placed the price of shingles at \$1.50 a thousand locally and \$2 a thousand at Winnipeg. This includes freight and handling. The old price before the price war and depression was \$2.65 and \$2.40 a thousand, which figures slumped by competition to the present prices and even lower. The association decided to unite again on prices and to commence at cost price of the manufactured article and advance rates slowly.

—Medicine Hat News:—On Tuesday evening a magnificent flow of natural gas was struck at a depth of 950 feet by J. A. Grant in boring for the C. P. R., just back of the new round-house. The well was capped for half an hour when the rock pressure accumulated was splendid. 25 lbs in 1 minute. 125 lbs in 4 minutes. 300 lbs in 10 minutes. 420 lbs in 21 minutes. 445 lbs in 30 minutes. The company is to be congratulated on the fine flow which has been struck and it is generally understood that advantage will be taken of the stroke to greatly enlarge the local works. The high pressure which has been obtained also means a big thing for the town proving as it does that the supply is practically unlimited.

—The latest journalistic novelty is a 28 page edition of the Calgary Herald issued on Saturday last. The issue was written, edited and the office managed throughout during the day by the Ladies Aid Society of the Calgary General Hospital and the proceeds of the venture go to the funds of that institution. Beside the ordinary news service there are several pages of special articles relative to the city and district. The editor-in-chief for the day soliloquizes through a column in the following strain:—"Well thank kind Heaven it's over! This is said most reverently from the depths of a glad but weary heart. The executive staff jointly and severally feel and look like a long wet week; but feelings and looks do not matter in the least, now that the great feat has been accomplished and the financial success of the Ladies Edition is sure."
